GENERAL INFORMATION

The IX Belarusian-Serbian Symposium "Physics and Diagnostics of Laboratory and Astrophysical Plasmas" (PDP-9) will be held in Minsk in September 16-21, 2012.

This is a continuation of our series of Symposiums which take place every two years at different locations of Belarus and Serbia (Belarus, Minsk, 1996, 2000, 2004, 2008; Serbia, Zlatibor, 1998; Belgrade, 2002, 2006; Donji Milanovac, 2010). More than 60 scientists from Belarus and Serbia have participated in these Symposiums. Due to these meetings the relations between scientists of both countries became more consolidated. Several bilateral treaties for scientific collaboration were signed and now the researches in the frame of joined projects are conducted.

Minsk is the capital of the Republic of Belarus, one of the famous scientific, industrial and cultural centers of Eastern Europe. Due to the lucrative geographic position (Minsk is the crossroads of the most popular European tours), Minsk is a very suitable place for arrangement of meetings and information exchange between scientists from different countries.

We invite you to take part in the PDP-9 Symposium. The Organizing Committee will try to make your stay in Minsk fruitful and pleasant.

CALL FOR PAPERS

Extended abstracts of invited lectures and poster presentations (up to 4 pages of A4 format) will be published in Symposium Proceedings. The Instruction for manuscripts preparation can be downloaded from the conference web page: <http://ifanbel.bas-net.by/pdp9>.
