

XI International conference

Plasma Physics and Plasma Technology

PPPT XI

**11th International Conference on
PLASMA PHYSICS AND PLASMA TECHNOLOGY (PPPT-11),**
will be held in Minsk, Belarus, from **September 15 to 19, 2025.**

The PPPT Conferences take place in Minsk every 3 years since 1994 bringing together the scientists and engineers in plasma physics to discuss latest research in the field of advanced plasma science from the understanding and modeling the plasma processes up to their applications in different fields.

The topics of the PPPT-11 Conference:

1. Modeling of plasma processes, plasma dynamics, optical and thermodynamic properties of plasmas
2. Electrical discharges and other plasma sources, novel plasma generation approaches
3. Atmospheric pressure plasmas, plasma in and in contact with liquid, plasma-liquid interactions
4. Non-ideal and dusty plasmas, extreme plasma regimes, fusion and astrophysical plasmas
5. Laser and plasma interactions with materials, laser ablation, modification of materials by plasma and laser treatment, sputtering and deposition
6. Plasma spectroscopy and other diagnostic methods, plasma chemistry
7. Plasma applications and advanced plasma technologies (plasma for nanomaterials synthesis and processing, plasma in medicine and biology, plasma in agriculture, water treatment and decontamination, plasma in spectrochemical analysis, plasma in catalysis, plasma metallurgy, etc.)

We welcome submissions for both oral and poster contributions.

Organizers:

- B.I. Stepanov Institute of Physics of the National Academy of Sciences of Belarus
- Joint Institute for High Temperatures of the Russian Academy of Sciences

In cooperation with:

- A.V. Luikov Heat and Mass Transfer Institute of NAS of Belarus
- Al-Farabi Kazakh National University
- Belarusian Republican Foundation for Fundamental Research
- Scientific-Technical Association «Optics and Lasers»
- Belarusian Physical Society
